CNC DOORMATIC

CNC Doormatic door openers are designed to automatically open and close the doors of CNC machines. Servo motor door openers are equipped with a self-learning control module that automatically detects resistance. CNC Doormatic is 100% reliable and can be used with additional switches, light sensors, pressure switches, etc.

Why Use CNC DOORMATIC?

CNC Doormatic is an automation system that can automatically open the doors at the desired gap size on CNC machines, has a door opening that can be adjusted with parameters, works in harmony with all control units, and is compatible with CNC I/O inputs.
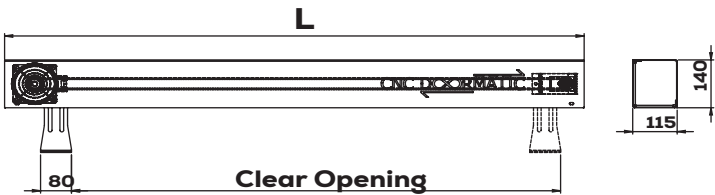

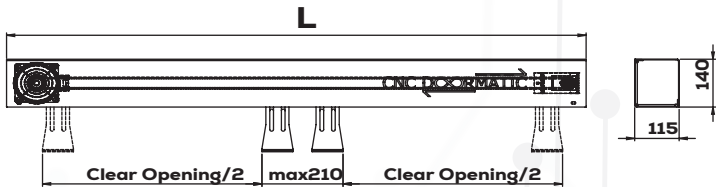

Output for machine to give close command to the automatic door
Output for machine to give open command to the automatic door
Output for machine to give deactivate command to the automatic door
Minimizing time cost with ADJUSTABLE opening distance feature
